

Reading Plus® Version 3.6.1 Upgrade Installation

TAKE NOTE!!

- You must have version 3.2 or higher installed on your server prior to installing the upgrade.
- The only technical changes to Reading Plus® from versions prior to 3.6 are the following workstation requirements:
 - Flash browser plug-in version 8
 - Java browser plug-in version 1.5.0_10
 - Student headphones are recommended for multi-media content
- Reading Plus® version 3.6+ contains numerous enhancements that require some data generated within older versions (versions 3.51 and below) to be overwritten. Most data from previous versions will be maintained, however we recommend having teachers review the list of data that will be deleted during the upgrade installation. Teachers can review this list on the last page of *What's new in 3.6*, available from our home page at <http://www.readingplus.com/>

Application Upgrade Installation Instructions (Orange CD):

1. Insert the Reading Plus® Upgrade CD, (Orange CD) into the CD-ROM drive of the server that the Reading Plus® application is installed.
2. Wait for the installer to auto start. If the installer fails to start, run RPUpgrade.exe off of the CD-ROM drive.
3. Follow the on-screen instructions. The upgrade will stop all application services, install the upgrade and restart the services. The upgrade may take several minutes.

License Upgrade Installation Instructions (Blue CD):

Note: if you did not receive a Blue license upgrade CD, you will not perform this part of the installation.

1. Insert the Reading Plus® License CD (Blue CD) in the CD-ROM drive of the server that the Reading Plus® application is installed.
2. Click on Start->Programs->Reading Plus® License Installer
3. This will apply the new license to your Reading Plus® installation.

If you have difficulties with the installation, please contact our technical support team at **800-732-3758 (Dial 4)**, or visit us online at: <http://www.readingplus.com/support>.
