

## Visagraph™ III Upgrade Instructions

1. Place the CD ROM into the drive and wait for the installer to start. If the installer does not start, open the CD ROM and run the `visaupgrade52.exe`.
2. A series of steps will follow: The installer will stop and remove all services, reinstall the services and install all the updates. This may take several minutes.

3. Once the install completes, click *Finish*. Your Visagraph™ III is now upgraded to version 5.2.0u.
